Designed with elegance, matched with convenience

About dormakaba Group

A trusted partner for safe, secure and sustainable access solutions – for every place that matters.

When you need innovative, reliable access and security solutions – in hotels, shops, sporting venues, airports, hospitals, offices or at home, we are there.

Where's your place? The answer for almost everyone is the same: we feel happiest in a place where we are both free and secure. A place where we can move around safely and seamlessly, without obstacles, worries or confusion. dormakaba enables this precious experience for buildings, spaces and communities around the globe, so that people everywhere can feel safe and secure in the places that matter to them. To put it in one sentence: dormakaba's vision is to be the trusted partner worldwide for safe, secure and sustainable places where people can move seamlessly.

Our global communities are always on the move: each year, the equivalent of more than half the world's population goes through an airport security gate. Each day, 11,000 new buildings are completed. The global construction industry will more than double in size this decade, to more than USD 14 trillion. By 2050, two-thirds of the world's population will be living in cities. Such places matter, deeply – they are where our global communities meet, work, and enjoy life. They are the stages for our greatest and most memorable moments. And dormakaba is right there as the partner at your side to make these moments count.

Automatic Entrance Doors

A modern office interior with a minimalist design. In the foreground, a dark grey sofa is partially visible. To the left, a vibrant red Egg chair sits on a dark floor. In the background, a desk with a laptop and a large monitor is visible through a sliding glass door system. The room is lit with soft, ambient light, creating a professional yet comfortable atmosphere.

CS 80 MAGNEO

A quiet & compact automatic sliding door system

An unrivalled automatic sliding door operator

The MAGNEO is a sliding entrance system powered by linear magnetic drive technology (LMD) and designed for any modern interior, whether public, commercial, or private. Innovative magnetic technology ensures that the MAGNEO is safe, reliable, whisper-quiet, and resistant to wear

Flexible and versatile

Due to the flexibility of this new system, the CS 80 MAGNEO opens up various fields of application. The sliding door operator is extremely versatile as it is suitable for in-wall (corridor) or on-wall (face-fix) installation, with both handing options available.

Simple installation and easy operation

For professionals and the normally skilled, the CS 80 MAGNEO is straightforward to install and easy to operate. The automatic sliding door operator offers all important standard functions and various special functions for your convenience.

Modular system

The CS 80 MAGNEO is a modular system consisting of door kits, cover and fixings, the CS 80 MAGNEO operator and accessories. The system allows virtually any door to be configured as an automatic sliding door.

Quality tested

The door system is tested for a minimum service life of 1 million cycles and is approved for application in emergency exits and escape routes according to DIN 18650 / EN 16005.

Features & Benefits:

- Safe, reliable, whisper quiet
- The Standard clear passage Width available as 875mm, 1000mm and 1125mm
- Modern design and easy operation
- Reduced lifetime cost of ownership

PORTEO

The Automatic door assistant
that adds convenience to doors

The Low Energy Automatic Swing Door Operator

The PORTEO is a silent swing door operator with small dimensions for the use on simple doors. The PORTEO can significantly reduce the force required to open the door in Power-Assist mode so that the door can be easily opened manually. In addition, the door can also be opened automatically via a push-button or radio remote control. This makes the life more comfortable and hygienic in everyday for everyone. The PORTEO can be easily retrofitted on most doors and offers people where doors are a barrier a significant gain in comfort and quality of life.

- Door assistant for swing doors
- Effortless opening and closing
- Compact dimensions
- Pull and push side, transom-fixed or leaf-fixed
- Easy installation – “plug & go” delivery

Features & Benefits:

- Extremely low installation height of just 60 mm
- Quiet and noiseless operation
- Quick installation and commissioning time due to Plug & Go function with mounting plate
- Options available as – Push and Go, Automatic Mode, Power assist and Permanent Open Mode.

ED 100/ED 250

A robust automatic swing door system for every application

The Heavy Duty Automatic Swing door system for Internal and External Doors

The Two variants ED 100 and ED 250 Automatic Swing door operators have compact dimensions and can be easily adapted to individual requirements thanks to its modular structure. It is a strong operator which combines safety and functionality all around the door.

With their ED 100 and ED 250, dormakaba offers electromechanical swing door operators for various fields of application. Simply select the suitable version according to your prevailing door-leaf width and weight: While the ED 100 is suitable for doors with a weight of up to 160 kg or a door width of 1,100 mm, the ED 250 is designed for doors with a width of 1,600 mm or a door weight of 400 kg.

Whether convenient access to entrance doors, secure fire doors individually or as a system solution for emergency exit and escape routes – the dormakaba ED 100/ED 250 swing door operators make all this possible.

Features & Benefits:

- Compact Automatic Swing door for internal / External application.
- Low-noise application due to multi-stage gear.
- Elegant visual appearance: dormakaba design provides a operator height of only 70 mm.
- Various functions as standard. • With integrated smoke detector
- Technically revised arm system in a new design.
- Better durability of the gear due to the use of the force balancing technology.

Restroom Door solutions

Elderly / Disabled People Restroom Entrance door Solution

Elderly and differently-abled people need additional protection and safety while accessing the restrooms. The Entrance door can be fitted with either an automatic swing door or a sliding door, the operator perfectly fits to give you an opening width of 1100mm. depending on the design of the space.

Features & Benefits:

- Highly safe entrance door solutions for elderly, old age homes, and differently abled restroom doors due to the Safety sensors incorporated
- Voice-assisted information about system status eg., Opening, Closing, locking, and occupied status
- Touch Free Door entrance door for opening, closing, and locking the system
- In the event of emergency needs, the user can create an alert noise by using the internal pull cord
- Additionally, external rescue can be done via from outside panel without the need of an emergency key
- Touch-free wave switches positioned on the entry and exit sides ensure safe and hygienic usage of toilet.

Applications:

- Elderly / Old Aged Homes Restrooms
- Senior citizens / Physically Challenged Restroom doors in the Homes

Framed Telescopic Door solutions

Automatic Sliding door systems

Outstanding solutions for tight spaces

The operating principle of the TST FLEX telescopic sliding door provides large passage widths in low overall widths. Telescopic Mechanism creates more passage width for the same operator length compared regular automatic sliding door. Thanks to its low profile width, the FLEX system allows plenty of light penetration. Offering high user convenience and easy accessibility, the TST FLEX invokes an inviting atmosphere. In conjunction with other doors from the FLEX family (FLEX Green and FLEX SECURE), the system can be used to create a harmonious overall look. The door panels are filled up to 22 mm double glazing.

Features & Benefits:

- Telescopic Mechanism creates more passage width for the same operator length compared regular automatic sliding door
- Slender FLEX profile system for transparent entrances
- Suitable for 22 mm double glazing
- Lateral closing edge with rubber safety profile
- Low k-value of frame due to double glazing
- Excellent insulation features thanks to interlocking side seals and top and bottom seals

Applications:

- Balcony entrance doors
- Clubhouse / Living room Entrances
- Common passage areas in floors

Versions available:

- Single sided Telescopic Sliding Door
- Double sided Telescopic Sliding Door

FFT Sliding Folding Door

Automatic Sliding door systems

Elegant Auto door for areas with restricted lateral space

When the door opens, both door panels fold simultaneously and swivel to the sides. This creates large passages although the overall system width is rather small. In addition, the hinges are of jam-free design and therefore especially safe.

- FFT folding and sliding door occupies the minimum of the door opening width and extremely little in depth
- FFT makes it especially suitable for narrow door openings, passageways where space is limited and it is particularly suitable for emergency exits and escape routes
- Jam-free profiles and No floor track requirement for internal applications, enabling unbroken floor finishes
- The innovative operating system of FFT FLEX detects wind loads and compensates accordingly to guarantee a smooth opening and closing behavior

Features & Benefits:

- Perfectly suitable for narrow passages
- System requires almost no lateral space
- Easy to install and upgrade
- Jam-free profiles
- High safety standard
- Low-noise operation
- Door panels do not swing out
- Minimum space requirement while open
- Free floor area
- Very economical and reliable
- Quality-assured manufacture
- Also suitable for emergency exits and escape routes (FFT-F)

Door Closers & Architectural Hardware

ITS 96

Concealed cam-action door
closer system

The integrated solution for prestige doors

The ITS 96 system offers an extensive range of solutions for the covered installation of door closers. The door-closing system can be integrated into nearly any door or frame and offers a high range of functions for single-leaf and double-leaf doors. Optionally available with hold-open function. The EASY OPEN technology enables a rapidly decreasing opening torque in accordance with German Industrial Standard (DIN) SPEC 1104, which makes it easy to pass through the door.

- Extensive range of models for barrier-free building
- Door leaf thickness ≥ 40 mm
- EASY OPEN technology
- Adjustable closing force and closing time
- For door leaf widths up to 1100 mm
- Latching action can be switched on or off

Features & Benefits:

- Perfect Combination of Aesthetics & Functionality
- Invisible Door Closer
- Smooth Effortless Operation - Easy Open Technology
- Reliable & Durable

TS 98 XEA

The highly versatile all-rounder

One door closer for all applications!

The dormakaba TS 98 XEA slide channel door closer features an attractive, high-grade XEA design and is also flexible and easy to install.

XEA Design

The closer body with an overall installation height of just 60 mm can be installed in all four ways.

Mounting options

ts additional SoftFlow closing range between 15° and 0° combined with a latching action between 7° and 0° provides whisper-quiet closing for all four installation types.

The hydraulic functions and the closing force EN 1–6 can be set conveniently from the front. The selected closing force can be read from an optical display. Delayed closing and backcheck are available for all installation types.

The proven EASY OPEN technology provides barrier-free access. Even in the icy cold at temperatures as low as -40 °C the TS 98 XEA cuts a fine figure.

TS 97 Door Closer

A perfect combination of form and function

A perfect combination of form and function

The TS 97 is ideal for barrier-free doors in accordance with German Industrial Standard (DIN) 18040 for door widths up to 1100 mm. EASY OPEN technology ensures the door can be opened easily and conveniently (resistance decreases almost instantly as door opens), and thus also meets the requirements of German Industrial Standard (DIN) SPEC 1104.

- Barrier-free according to German Industrial Standard (DIN) 18040 for door widths up to 1100 mm
- Uniform length of door closer and slide channel
- Easy opening of doors in accordance to DIN SPEC 1104
- Low depth (only 37 mm)
- Adjustable closing force EN 2-4
- Includes standard limit stay

Features & Benefits:

- Perfect Combination of Form & Function
- Impressive Design - Enhanced Visual Appearance - Uniform door closer body & arm
- Smooth Effortless Operation - Easy Open Technology

RTS 85

Transom concealed door closer

Attractive – with a concealed installation in the door frame

Ideal for doors in variable partition walls. Can be used for double-action doors as well as single-action doors. Elegant, versatile, practical, and reliable quality.

The RTS 85 panel door closer meets the demand for a door closer that is concealed in the frame and door construction. Of course, this installation requires the appropriate design of the top frame and door construction. The RTS 85 panel door closer – a double-action door closer with excellent quality – can also be used for single-action doors with the appropriate accessories.

The RTS 85 transom concealed door closer offers a solution for installations where door control must be provided without disturbing the aesthetic appearance of the door. A complete line of accessories is available to accommodate virtually any door and frame configuration.

Features & Benefits:

- Concealed installation in the door frame
- For door leaf widths up to 1,250 mm
- Can be used for single-action and double-action doors Incl. back check
- Wide range of accessories for almost every configuration

BTS 80

Versatile & Adaptable Floor Spring

Door closer system for single and double-leaf doors

As a Universal floor spring, the BTS 80 has been designed to meet the requirements for all door types and can satisfy every application required, due to its versatility. Once installed below floor level, the mechanism is almost completely concealed from view.

Features & Benefits:

- Dependable – Trouble Free Performance in all conditions
- Smooth Effortless Operation
- Versatile & Adaptable to suite varied door types/sizes
- For use on both single and double-action doors
- Can be used on fire and smoke check doors
- Minimal Effort on opening & closing operation
- Suits door weight upto 300kgs
- Concealed assembly
- Easy to install
- CERTIFIRE Approved CF127

Fields of Application:

- The BTS 80 is a versatile floor spring that can be used in numerous situations. For any environment, that requires a compliant entrance that does not encroach aesthetically on its surroundings, the BTS 80 concealed floor spring is ideal.
- External Doors – Heavy Duty – Large/Heavy Doors

BTS 75 V

Floor Spring

Universal application range, individual functions, assured quality

The BTS 75 V is a highly adaptable floor spring suitable for all standard single and double action doors and for exterior doors with widths up to 1.100 mm.

Features & Benefits:

- Concealed installation
- Adjustable closing force EN 1-4
- Easy door opening acc. DIN SPEC 1104
- Maximum ease of use
- Smooth opening & closing movement
- Minimal Effort on opening & closing operation
- Flexibility to fit door sizes/type

CONCEALEO Hinges

The Perfect Solution for Seamless Closure

Uniting Door Strength and Design Excellence

CONCEALEO® - the concealed solution for perfect closure. 3D adjustable concealed hinges conforming to ANSI & EN Standards.

CONCEALEO® is the new trendsetter, combining high aesthetics with demanding functionality. Robust, maintenance-free, and hidden. A practical yet discreet performance hinge for your needs.

The CONCEALEO® product range provides an all-embracing product line-up, with load-bearing capacities of 40 to 350 kilograms per pair, it covers the entire door spectrum from the simple domestic door to the highly complex commercial property door.

The design principle forms the heart of the CONCEALEO® hinge range. A symmetric four-knuckle joint evenly transfers the forces from the door-leaf into the frame. It is connected to the hinge elements by pistons which support the hinge transversally and channel the opening and closing forces in circular fashion in all directions.

Features & Benefits:

- Aesthetics & Functionality Combined
- Smooth & Silent Operation
- Concealed Fixings – Ensuring no visible screws for design aesthetics.
- Piston Guides – For maximum efficiency.
- Five Axis Joint – Designed for long-term maintenance-free operation.
- Solid Machined Piece – For strength.
- 180° Opening Angle
- 3D Adjustment – For hassle-free installation and maintenance

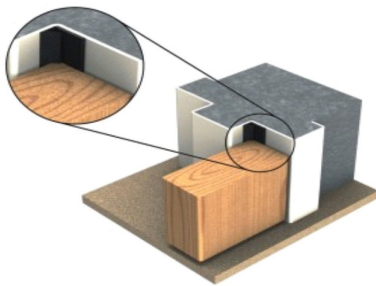

Door Seals

The Solution for Uninterrupted
Comfort

For doors and windows to function, they must have gaps between their edges and their frame, these gaps allow intrusion of noise, smoke, fire, rain, insects etc. The solution is to get the right seal for right door type which seals the gap around the doors when closed to seal against combination of intrusions and leakages. Properly fitted, they can provide a complete and continuous seal for all door type that will not impede normal use.

Features & Benefits:

- Enhanced Acoustics environment
- Energy conservation – Dirt & Weather Protection Fire & Smoke protection
- **Application:** Main Doors, Interior Doors

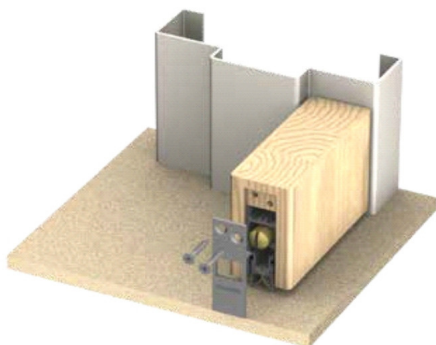

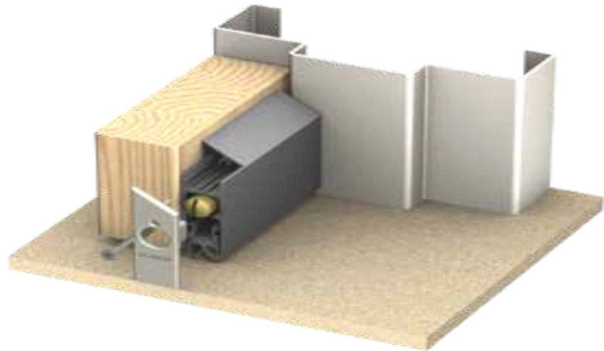

IS8010si

- Concealed fixing

- Secure Access Temporary – SAT
- Double key override function – BSZ
- Self changing cylinder: Modification to the access authorisation in no time

01 Service Area | 02 Guest Toilet | 03 Bedroom 1 | 04 Bedroom 2 | 05 Bedroom 3 | 06 Toilet 1 | 07 Toilet 2

Common Lock System – Each individual key opens its own cylinder plus the main door in a home. In a typical home set up Master Key Systems provide convenience, control and security.

One of the most niggling problems of living in a large home is the sheer number of keys you may need to handle on a day-to-day basis. You may lose keys often and find it hard to access spaces in your own house when you need to. You may not be able to restrict some people from accessing certain areas in your home. All these issues can sound trivial, but they snowball into a serious impact on your living experience in your own home.

The solution lies in simplifying your keys. Imagine having the ease and convenience of accessing every door in your home with a single key. Imagine being able to configure every other key difference to give selective access to various spaces in your home to different people. dormakaba's master key system enables you to do all that. It provides easy, secure, and flexible access in your home

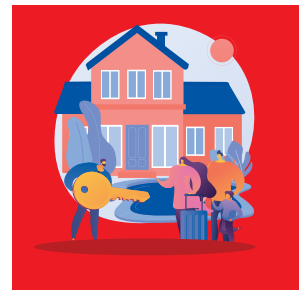

Applications:

Luxury home owners

Individual home owners

Those modernising/
upgrading their large homes

One Home One Key Concept is a key plan whereby selected keys can open a number of pre- defined doors. It helps maintain better control, saves key replacement costs and is convenient, as there are a lower number of keys in circulation.

Shake your phone

Open the Lock

RL599+, a 5-in-1 function digital rim lock, is a surface mounted intelligent electronic lock that provides a convenient and secure locking solution for all residences. This intelligent lock comes with a 5-way access system, making it an easy-to-use solution.

Features & Benefits:

- RFID Tags, PIN, Mobile Access by Bluetooth Low Energy (BLE), M-Key
- High-resolution backlit keypad
- Rim Lock
- PIN code sharing by mobile APP
- Supports up to 4 PIN codes
- Supports up to 100 Fingerprints
- Supports up to 100 RFID cards/fobs
- Up to 10 Mobile phones could be paired to a lock
- Supports deletion of individual RFID card
- Auto-manual lock function
- High-temperature alarming function
- Alarm for multiple-entry failure
- Low battery indication & alarm
- High voltage protection system
- Internal Force Lock Encryption system for anti-hacking Volume control & Mute function
- Auto re-lock function Integration with VDP & Remote control (Optional)
- Finishes: Black

Durable metal body

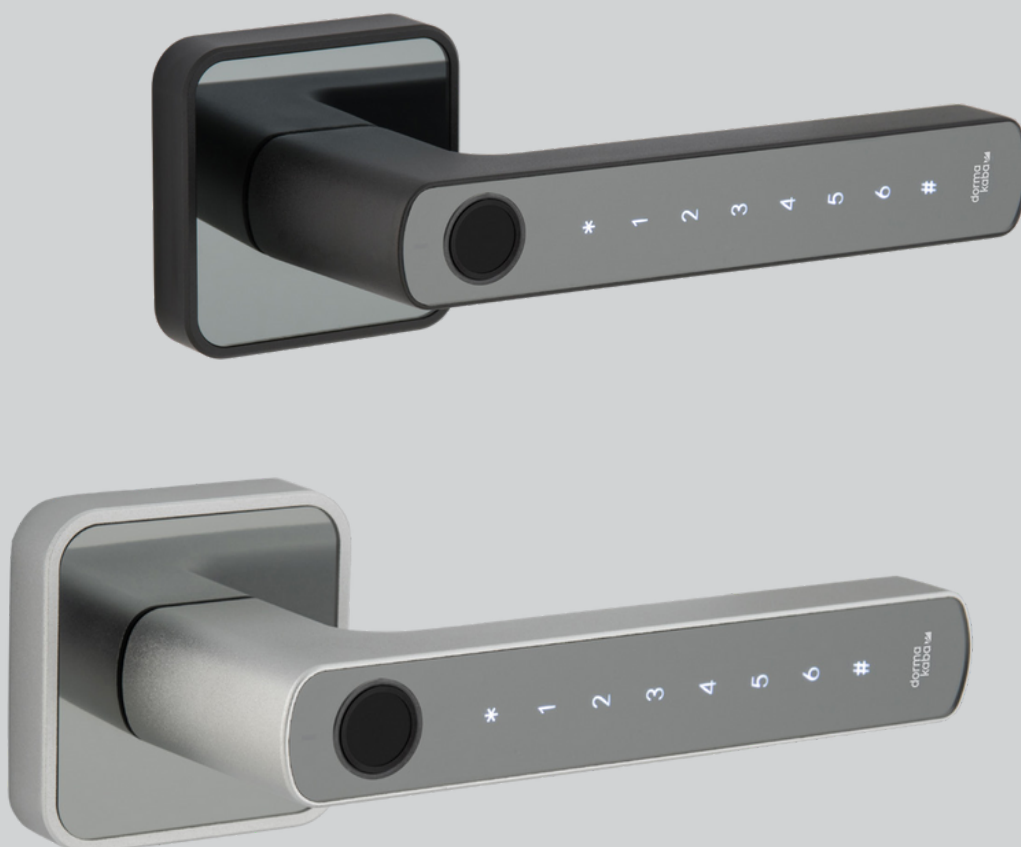

5+1 way access control

Emergency power via 9V battery

Auto and manual lock functions

Rosé

Biometric Digital Door Lock

Leave your keys in your pocket

The Rosé biometric digital door lock is a smart and innovative door handle solution that provides fast and secure access.

Open the door between the garage and the house with your fingerprint or PIN code. Also perfectly suited to student accommodation rooms, storerooms, studies, etc.

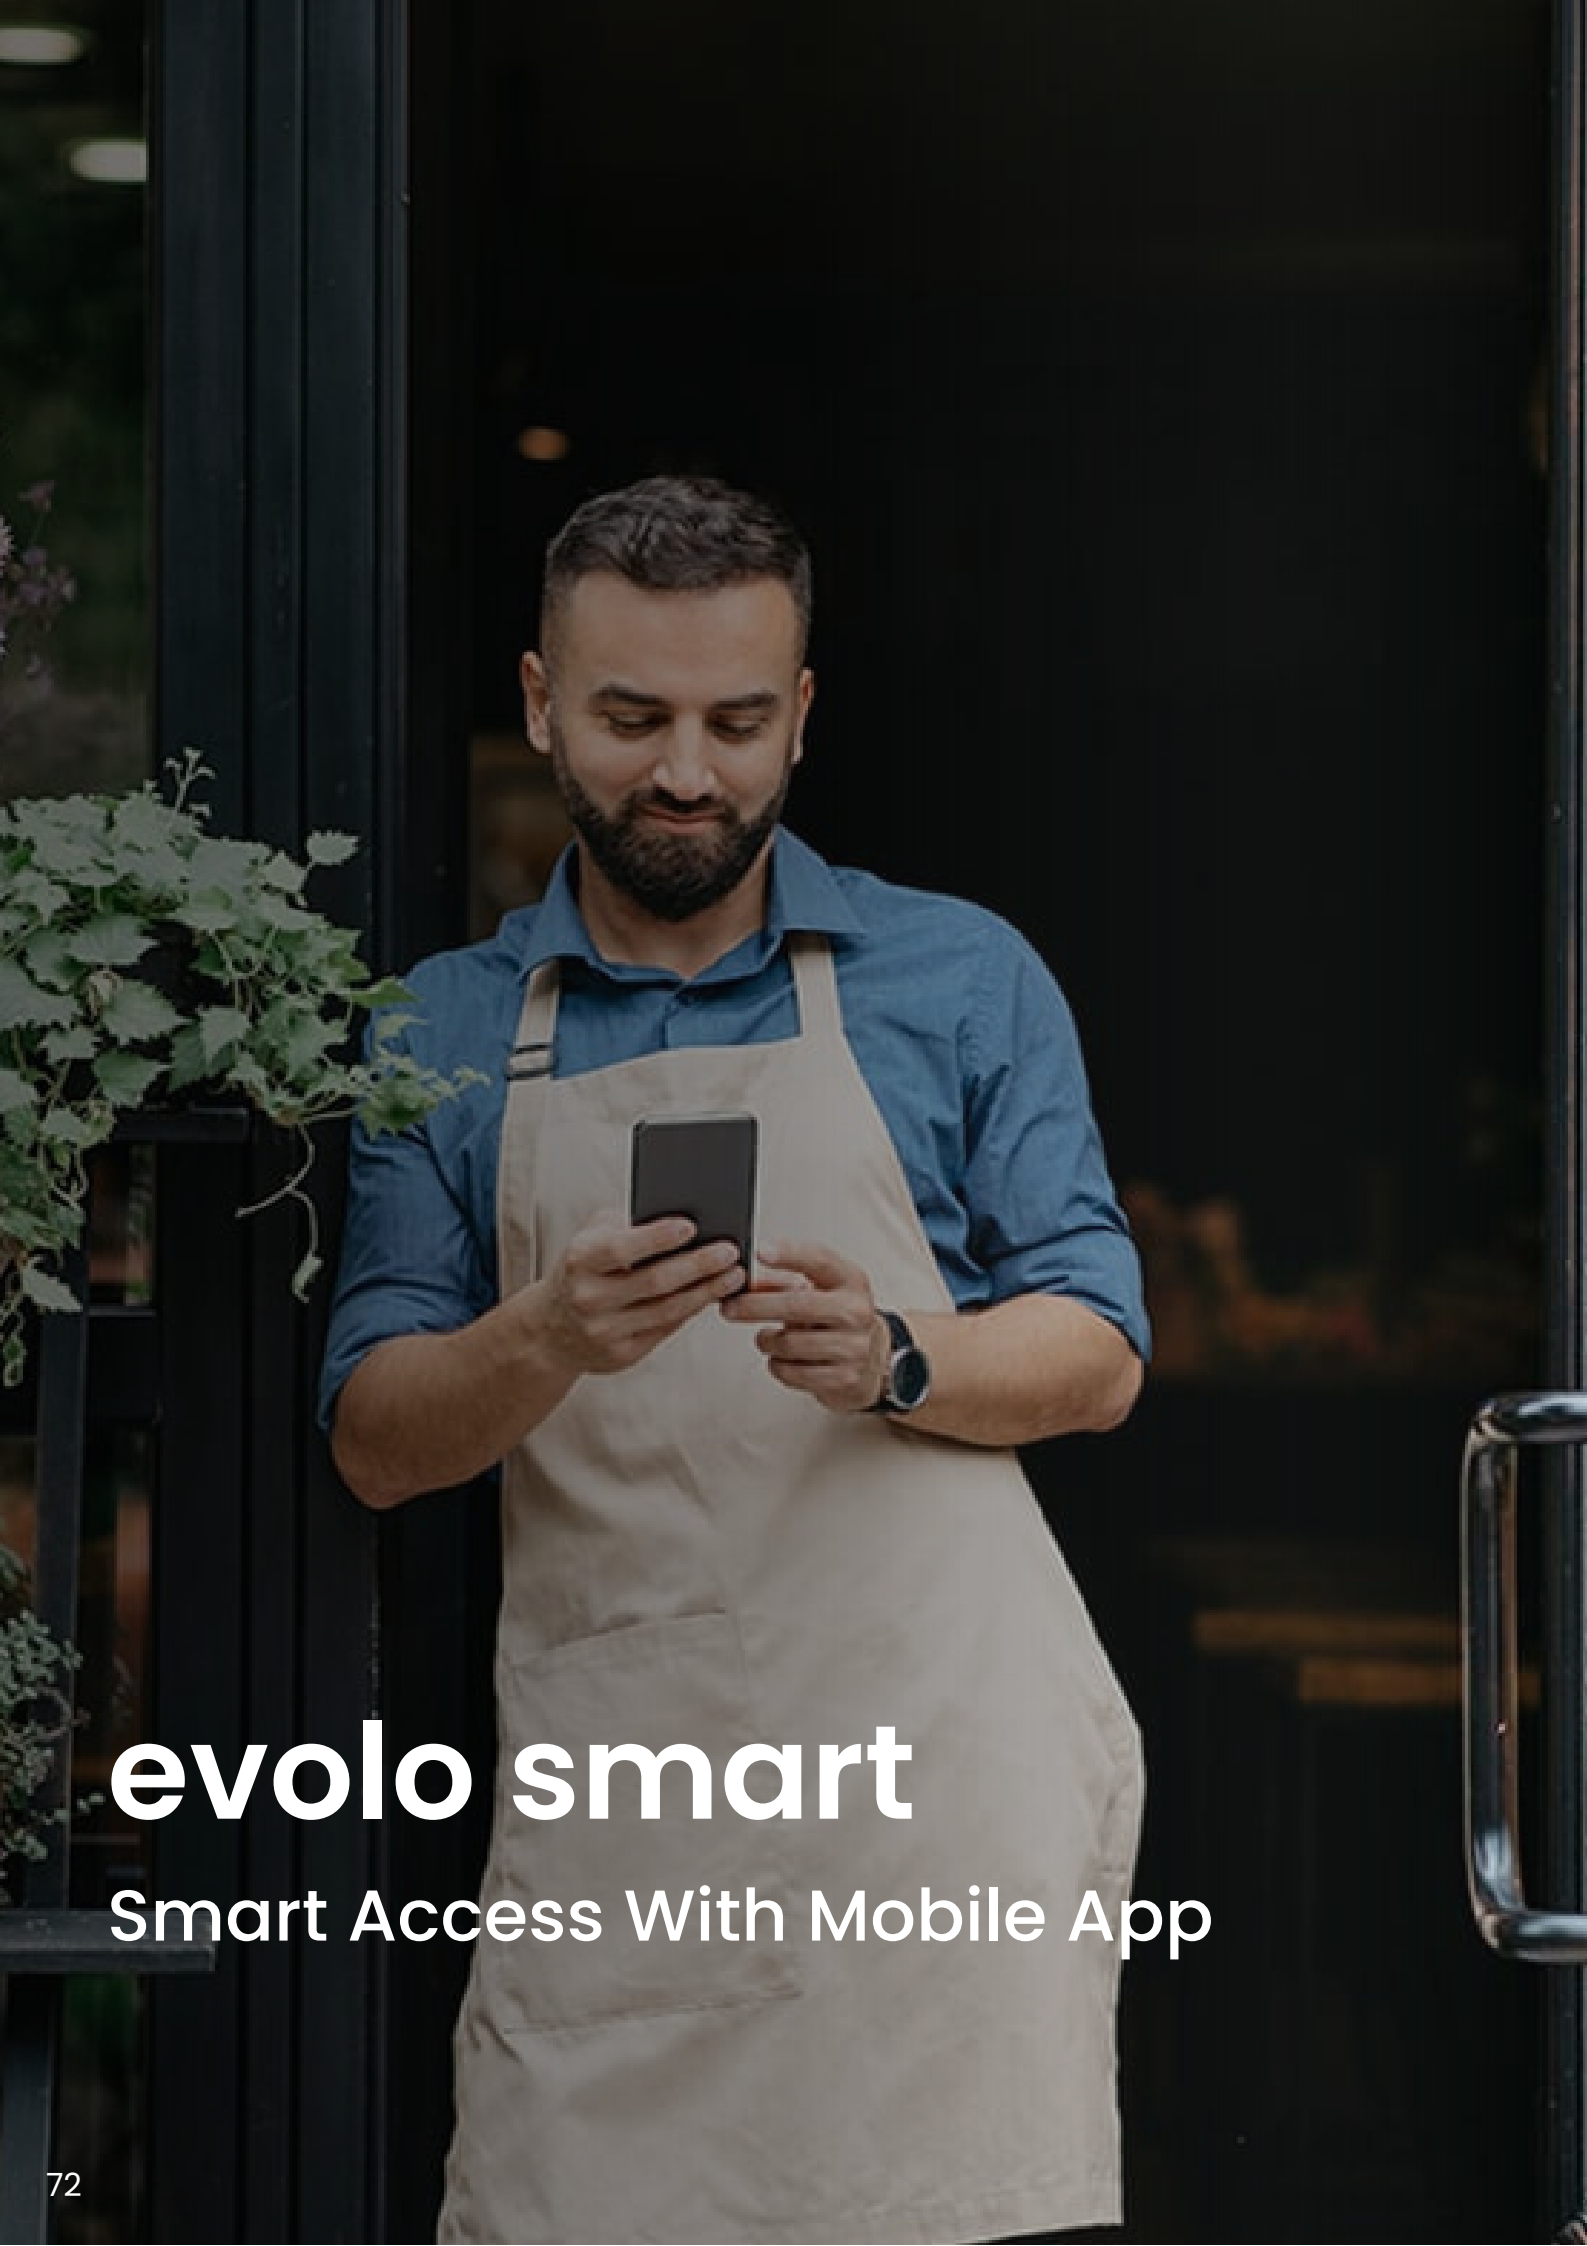

The solution includes a highly reliable biometric reader complemented with an electronic keypad.

The Rosé can be installed left or right-handed, depending on your door; no need to specify the handling of the door.

The Rosé comes complete with a high-quality dormakaba 60mm backset tubular deadlatch for maximum security and reliability.

Features & Benefits:

- Smart & Innovative Rose biometric digital lock
- Highly reliable biometric reader complemented with an electronic keypad
- Perfectly suited to student accommodation rooms, storerooms, studies, etc.
- No need to specify the handing
- Available with 3 modes - **Standard, Passage & Dual User**
- Keyless entry
- Operated by fingerprint or PIN code
- Non-handed
- Finish: Silver or Black

evolo smart

Smart Access With Mobile App

The Solution – Simple and Secure

Take advantage of dormakaba's proven evoluo door components to secure your doors. Depending on your needs, there are different versions and access media to provide you with the optimum solution.

The evoluo door components are standalone operated. This means that you do not have to carry out any additional wiring. If you are using conventional locking cylinders, you can switch to evoluo smart without major installation effort.

This means investment protection for you because the electronical door components can be transferred to other dormakaba access solutions at a later stage if required.

Your dormakaba specialized partner will be happy to advise you on which components are the right ones for you.

Convenient Programming of Access Rights via App

Small businesses such as petrol stations, start-ups or retail and craft businesses with up to 50 people also require efficient access control solutions. With evoluo smart, we offer you a solution which might be just right for you.

New employees, temporary staff, people leaving the company or lost keys: It quickly becomes difficult and time-consuming for you to maintain an overview and consistently secure your business. You might need a modern access solution to easily manage your doors.

evoluo smart is particularly suitable for microenterprises.

What is so special about our solution: you do not need any extra hardware to program your door components, change or cancel access rights. You can do all this quickly and easily with your smartphone.

Digital Cylinder

For next-level convenience

A Smart Solution for your door

With the dormakaba digital cylinder, accessing your premises becomes easier and more secure. With its high quality, award-winning design and space and time-specific programmability, you can enhance your security by setting up easy-to-use access control.

The handling is convenient: simply hold your valid RFID card, key fob, or smart key to the outside knob. The light ring briefly lights up green, and you can enter.

As an option, you also are able to send access rights to smartphones so they can be used as access media.

Features & Benefits:

- Suitable for both inside and outside doors (IP56 external knob)
- Modular design
- Both external and internal doors can be equipped with a digital cylinder
- The digital cylinder is easy to program and suitable both for individual doors and as an element of a large access system
- High-quality, award-winning design
- Variety of profiles, options, and finishes
- Safety-relevant parts are in the protected cylinder core
- Suitable for installation onto fire protection doors (Fire safety: EN 1634-2: 95 mins)
- Optical and acoustic signals
- Battery: 1 x 3 V CR2 lithium; life 50,000 cycles / up to 2 years

Options:

- Increased anti-drill protection (VdS BZ+)
- Standard Finish: Inox look
- Optional Finish: Black / Polished Brass / Bronze

c-lever compact

More than just a door handle

Smart control for your access

Take your access control to the next level: set access rights easily and change them whenever needed, accurately in time and location. Simply present an authorised badge, smart key, fob with RFID or a smartphone and open the door as usual by pushing the door lever.

Open your door in the normal way. After presenting the valid access medium, a green signal lights up and you can operate the door as usual with the lever handle.

Choose the access medium that suits your needs – be it a card, a key fob, a key with RFID or your smartphone. The access media can usually be used for other applications that already have been established in your company

Features & Benefits:

- **Contribution to sustainability:** Manufactured from durable materials using resource-efficient design, allowing updates and repairs
- **Efficient solution:** For interior doors – wooden, metal, and even glass
- **Easy cable-free installation:** Even in upside down position
- **Can be combined seamlessly:** Large product range in the same high-quality design
- **Mobile Access function:** Users can receive access rights onto their smartphones via the dormakaba app
- Ideal for interior doors: glass or office doors
- Fits all common mortise locks
- c-lever compact can be rotated on site, optionally reading antenna above or below handle
- Flexible – lever direction right or left – can be selected on site
- Won design award: German Design Award Special 2017
- Supports Mobile Access function
- Emergency opening
- Battery (2 x AAA alkaline) life: 60,000 cycles or 3 years
- Reader color – black

c-lever pro

Electronic door lock

Security and design in one

The electronic door lock c-lever pro offers elegant design and high functionality. Control your access precisely for a nearly unlimited number of users to the right areas at the right times.

Set access rights quickly and change them easily in standalone, remote or online mode. Assign access rights to smartphones so that users can use their mobile devices as access media to enter.

Sophisticated design

You can operate the door easily: whether it's with a card, key fob, a key with RFID or a smartphone – the green signal of the digital lighting unit will appear after presenting your access medium, and you can open the door with the lever handle as usual.

The quality materials meet high standards in terms of robustness, weather resistance and security. In addition to offering protection against intrusion and fires, the c-lever pro can be used for emergency exits and escape routes.

You can control access precisely for an almost unlimited number of users according to specific places and time periods. You set access rights and can change them quickly and flexibly, in standalone, remote or online mode. Furthermore, you can grant access rights to smartphones so that they may be used as access media at the door.

Features & Benefits:

- Fits all common mortise locks
- Suitable for exterior and security doors (IP55 for external assembly)
- Burglary and / or weather protection: EN 1906, application class 4 – High frequency of use on doors that are subject to frequent violent use
- Access media: RFID cards / key fobs with QR-code and Mobile key
- Battery integrated inside the housing (2 x AA)
- Battery life: 150,000 cycles or upto 3 years
- **Reader color options: Black, White**

A man with short brown hair and a light beard, wearing a grey V-neck sweater over a white collared shirt and a blue tie, is smiling as he uses a white card to unlock a door handle. The door is glass and metal, and the background shows a modern office interior with a glass wall and a door.

c-lever air

The smart solution
for Home & Microenterprises

Elegant and compact design

Control access to the right areas at the right times with the c-lever air, our electronic door furniture which is as slim as a normal door plate.

The c-lever air meets high aesthetic and functional demands for your access control. A special feature is its thin door leaf design, which at 10.5 to 11.5 mm generally makes it possible to continue using existing lock cylinders. Its flat design has already been awarded a few times.

The c-lever air is part of the dormakaba evolo standalone portfolio. No wiring is required within the door because the unit is operated with two standard batteries. Combined with lever handle elements on the inside, the same look can be obtained on all doors.

The electronic door furniture c-lever air is designed as flat as a mechanical door fitting, and lets you control access to the right areas at the right times. Its slim design has already been awarded with many design prizes.

The c-lever air is used on inside doors, and it is operated standalone, i.e. no wiring is required within the door because it runs with two standard batteries. Choose one of our system solutions suitable for you, depending on your requirements like the number of users and doors.

Features & Benefits:

- Suitable for interior doors, design objects, architecture buildings, modern offices or museums and galleries
- Flattest electronic fitting
- Award-winning design
- Wide version (for solid leaf doors) and narrow version (for metal frame doors)
- Easy and quick installation
- RFID Fob / Card and Mobile Access function
- Battery integrated inside the handle (2 x AA)
- Battery life 120,000 cycles or 3 years
- **Reader color options: Black, White**

compact reader 91 04

The slim solution

Nice and narrow

The streamlined compact reader blends harmoniously into any building. Hold an RFID card, key fob or key up to the reader and enter – the reader gives a visible and an audible signal of authorisation. Suitable for indoor and outdoor use with the weatherproof IP66 version. The slim design allows installation directly on metal, wood and plastic door frames. Can be integrated into several dormakaba systems – whether in online or standalone mode.

- Operation is easy: just present either a badge, key fob or key with RFID to the reader and enter.
- The dormakaba compact reader 91 04 can be seamlessly integrated in all dormakaba systems,
- Whether online, CardLink or standalone operation. For indoor areas, the reader can easily be connected to the basic frame and wired – thanks to quickwire technology. This connector simplifies assembly and maintenance.
- A weather-proof option with outgoing cable is available for external areas.

Features & Benefits:

- **Slim and compact:** Fits on smallest surface areas, directly onto door frames
- **Water-resistant and weather-proof:** The IP66 option is available for rough weather conditions
- **Easy installation:** Cable can be installed easily in the door frame; with quickwire technology or sealed cable output
- **Seamless integration:** Works in online, Mobile Access mode, CardLink/AoC mode or standalone mode
- **Investment security:** Compatible: Mixed operation with dormakaba access systems possible
- **Both practical and attractive:** Contemporary and robust design without corners and edges

cabinet lock 21 10

Efficient Protection for Valuables

Access Control for furniture

Store your valuables in wardrobes, lockers or other furnishings safely and reliably – and fully cable-free. Upgrade your electronic access control system* with the dormakaba cabinet lock. Secure not only your doors, but also access to important documents, valuables or materials. Simply hold the card against the cabinet door. A green LED light appears and the door opens automatically. Just push the door to close it, and the lock locks again.

The cabinet lock can be seamlessly integrated into both our standalone and online access systems. This enables you to access rooms and open cabinets with just one access medium. Time-consuming administration of keys is thus a thing of the past. Likewise, you no longer need to worry about forgotten PIN codes or the costly replacement of keys and locks in the event of loss.

With the electronic cabinet lock, you can protect your personal documents and materials against unauthorised access in wardrobes, lockers and other furniture – easily and conveniently without turning a key.

Features & Benefits:

- **Efficient security:** You don't need any timeconsuming key administration
- **Seamless integration:** Part of the dormakaba system environment including digital cylinders, electronic fittings and readers
- **Convenient:** Just hold the access card to the door to open the locker
- **Discreet and elegant:** Installed from the inside and works cable-free with battery
- **High Security:** Thanks to sturdy construction and alarm function

Credentials

Secure, Reliable, and Customizable

Efficient access control

dormakaba provides a diverse range of badges that use proven RFID (radio frequency identification) technology.

In addition to the popular smart cards, key fobs with RFID also serve as user-friendly access media. dormakaba designs and encrypts these products according to your requirements and wishes.

- **Smartcards with RFID:** These badges are flat and easy to carry. Programmable with time and room permissions, the access card can also be used as a means of identification.
- **Key fobs with RFID:** The contactless key fobs are available in different shapes and colours. Practical to use, it is easily recognised on a key ring.

Features & Benefits:

- **Versatile applications:** RFID cards can be used for access control, time recording, printer controlling, making payments, employee badges, and much more.
- **High level of data security:** Our special data encryption makes your system secure.
- **Efficient media management:** Administer the RFID media within your access control and assign access rights efficiently.
- **Customization:** Design your RFID media according to your wishes: with company logo, picture, personnel number or other labels.
- App-In purchase of virtual keys for access with the smartphone.
- Digital key vouchers are also available from dormakaba
- With the virtual key, there is no need to hand out physical access media any more
- Free download of dormakaba Mobile Access app from App store or Google play store:
(Compatibility)
 1. Bluetooth® and/or NFC-HCE interface
 2. Android Version 6.0 or higher
 3. iPhone with iOS 11 or newer

Interior Glass Systems

MANET

Minimalist elegance for the
connoisseur

For toughened glass assemblies

Architecture requires space for vision, experimentation, and design liberation. Modern internal architecture, with its use of glass and stainless steel, expresses a demand for more freedom in the interplay of transparency and light, shape and color, weightlessness and structure. Designers wishing to make their mark using high-quality materials such as glass and stainless steel opt for quality, a long lifetime, and outstanding design.

If you are looking for products offering optimum elegance and visible technology for a range of application areas in internal architecture, dormakaba delivers the ideal solution.

Whether for pivoting or sliding doors or for space configuring glass partitions.

Single-Point Fixings for Interior Applications:

Thanks to the flexible modularity of the system, MANET offers architects and specifiers a free hand in creative made-to-order design with space, vision, and light as a foundation. The basic component is the single-point fixing which is countersunk into the glass and provides for a perfectly flush finish in all applications.

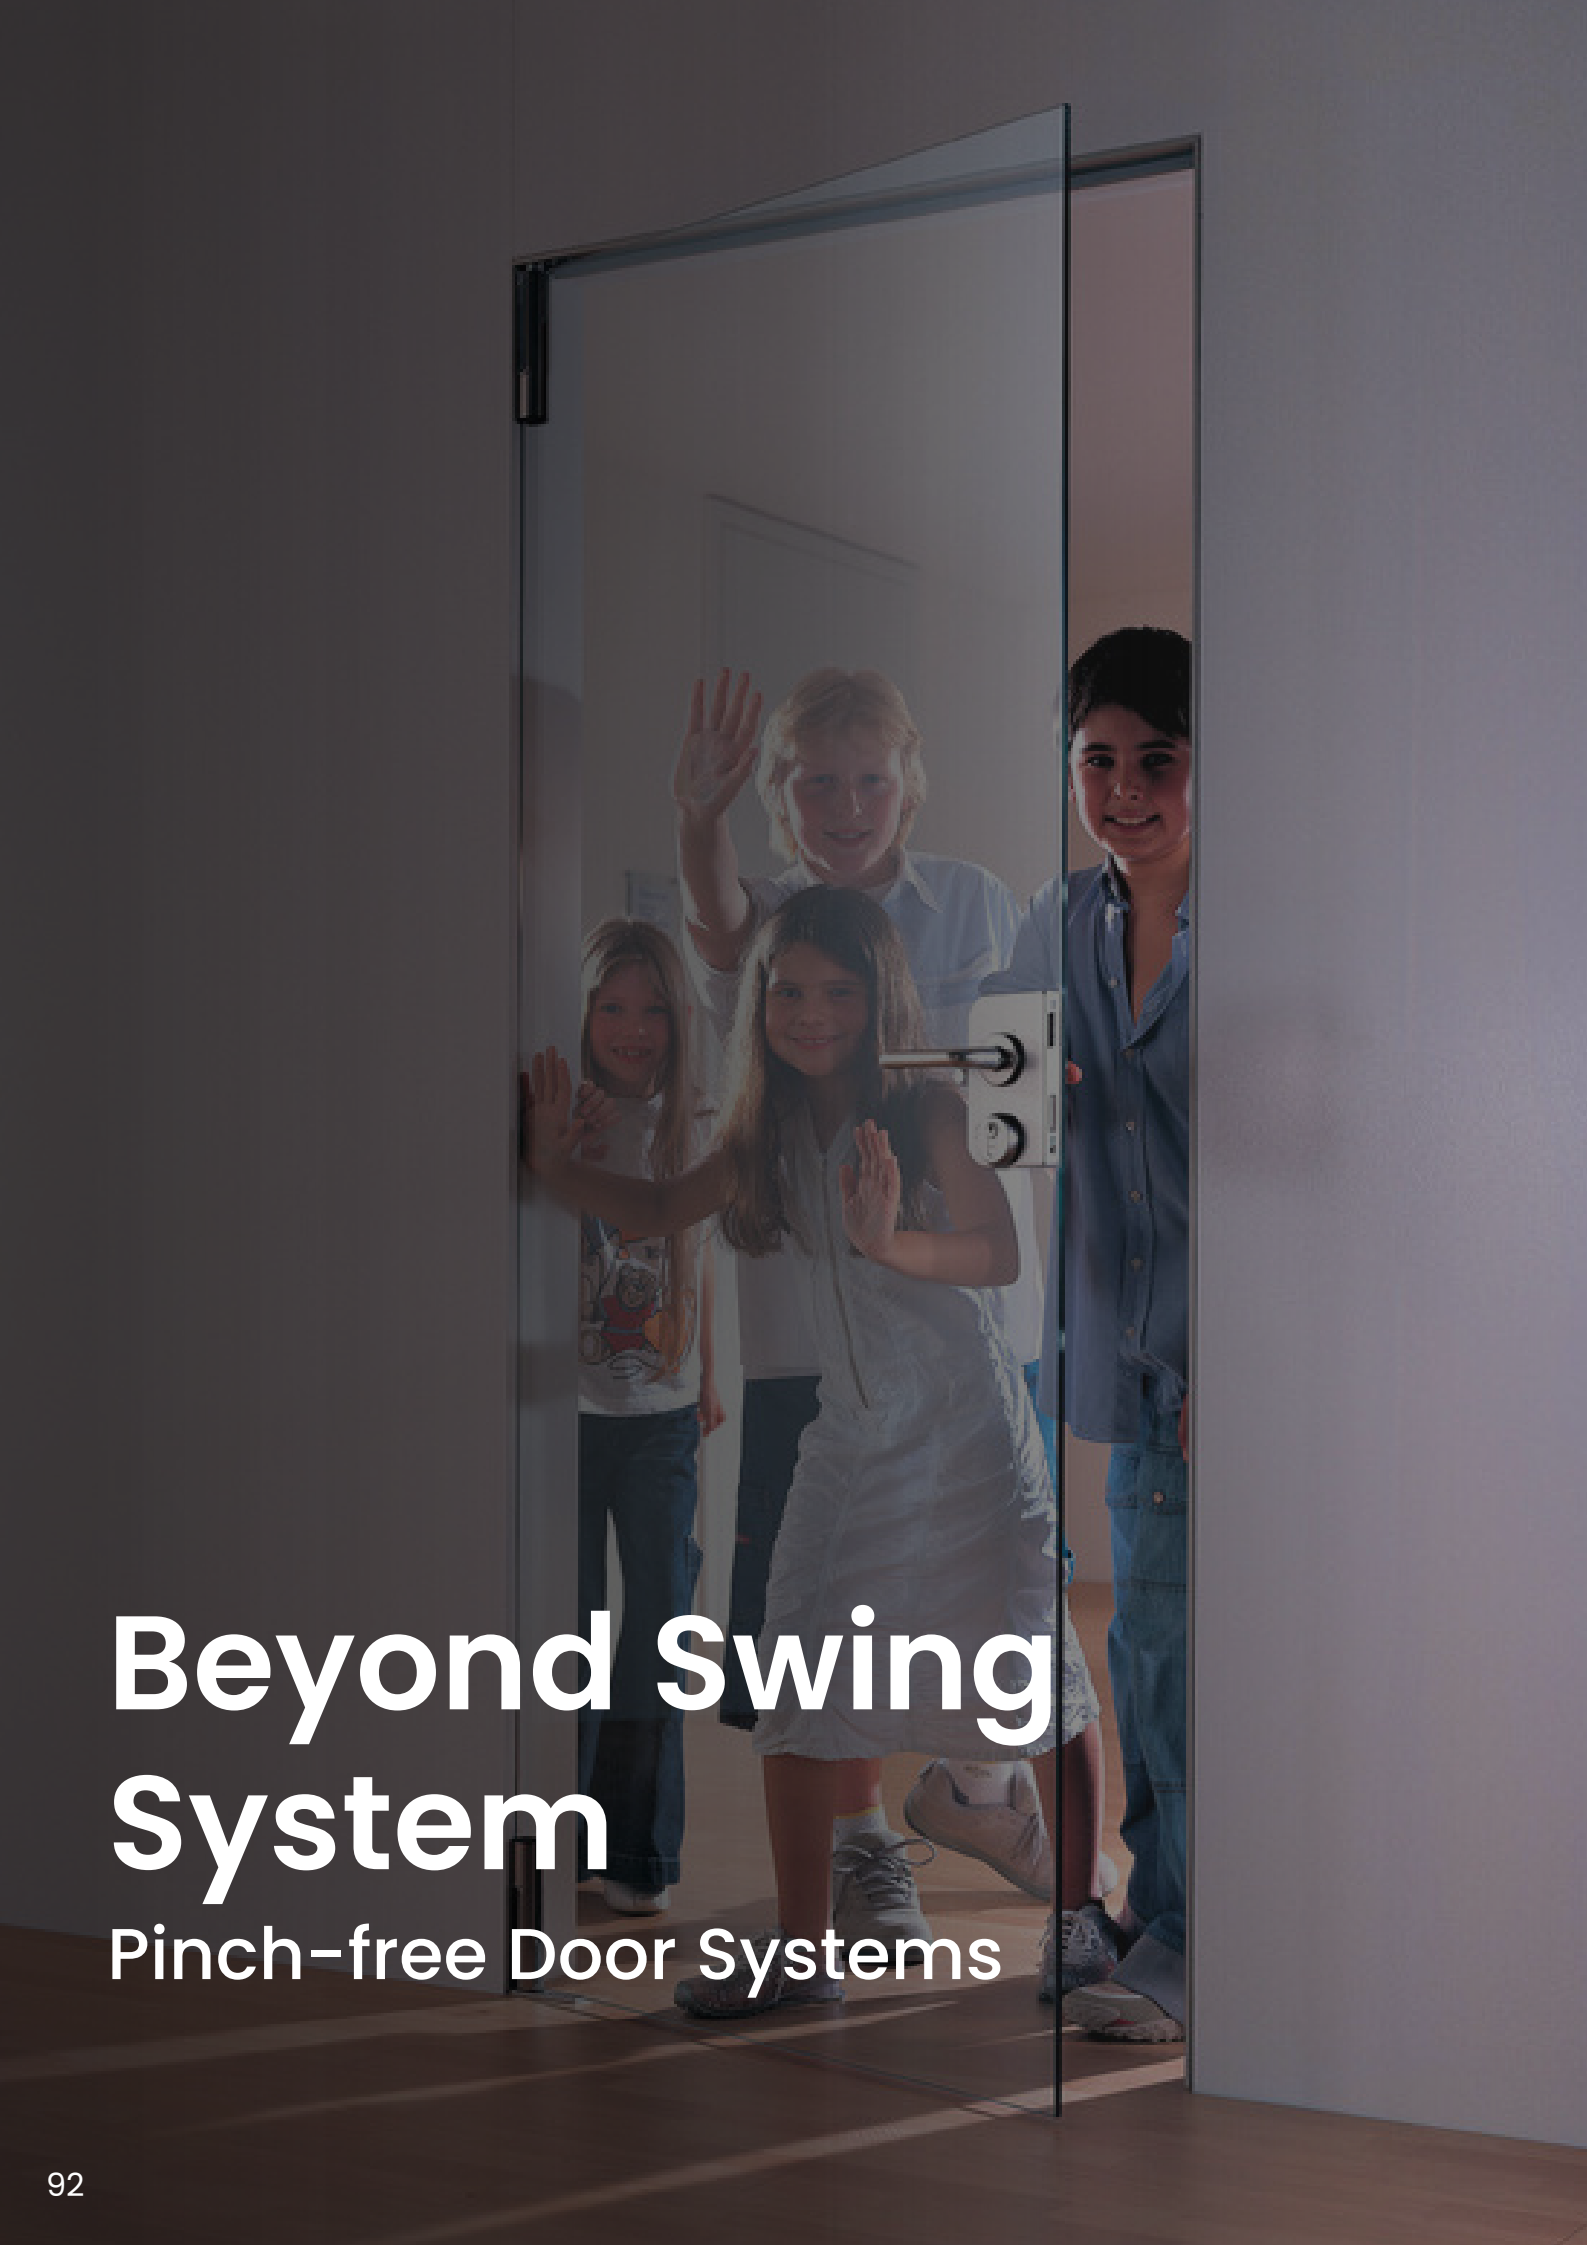

- Flexible modularity
- Available for several glass thicknesses
- Minimalist appearance
- Creation of light, space and vision

Features & Benefits:

MANET Concept – single point fittings
The MANET Concept is a flexible modular system that gives architects and designers a freehand to create

- Pivoting or sliding doors
- Space configuring glass partitions
- Customized hardware design

The distinctive MANET single-point fixings ensure a minimalist appearance and the creation of light, space and vision in any room.

Beyond Swing System

Pinch-free Door Systems

The unique BEYOND system for glass doors is safe, functional, and attractive. Characterized by its systematic design and clear styling lines, dormakaba BEYOND enables you to build frameless swing glass doors into tempered glass assemblies and wall openings.

Prevents the risk of trapped fingers

With the patented dormakaba BEYOND swing door system, the pivot point is located centrally in the glass axis and close to the glass edge for anti-pinch/anti-nip safety. This feature prevents the risk of trapped fingers often found on the hinge side of glass swing

Variety of options

A smart short rod make dormakaba BEYOND adaptable to any room situation. To meet your requirements, dormakaba offers suitable fittings for 10 mm and 12 mm glass along with a choice of pull handles or lock.

Secure, safe and functional

Developed with market requirements in mind, dormakaba BEYOND offers a practical alternative whenever you need to complement security, safety, and functionality with an attractive design.

Features & Benefits:

- Secure, safe, and functional
- Pair with dormakaba Floor pivots for free swing or BTS Floor Spring for self closing
- No need for a doorframe
- High level of transparency due to the low metal fitting size
- Flexible application for many different door situations

Studio 1121

The new lock design, now ever
more diverse

After the exclusivity and quality of the lock and handle combination of the „First“ and „Black Edition“ were very well received, STUDIO1121 is now going into series production. The extraordinary design of the previous versions is now being continued in our tried and tested finishes and in a wide range of lock variations. The design and haptics of the STUDIO1121 series can be perfectly combined with our OFFICE Classic hinges.

Special design due to special manufacturing process

The milling of the lock caps out of solid aluminum allows finely worked-out radii and defined edges. The remaining material thickness visibly shows the special value of the fitting. Equally high-quality, the powder coating of the lever handle, lock, and hinge surfaces not only flatters the eye but also the sense of touch – a good feeling with every contact.

Exclusive, modern and elegant

Now choose a set in our proven eloxated or powder-coated finishes. Is an individual design desired? With our in-house powder coating, there are no limits to the colour possibilities. Create a harmonious overall appearance by matching STUDIO1121 to the colour tones of existing dormakaba-Glas elements with our standard surfaces. Also in the lock variants, you have the options of non-locking latch, non-locking latch, lever forward, prepared for profile cylinder, toilet lock and the matching strike-box. Discover the combination that integrates optimally into your installation environment.

Features & Benefits:

- Fittings for Internal Doors.
- Special Design and Special finishes for the Premium Look and Feel
- Interplay of Colors, Black Brown Powder Coated for Lock caps and Hinges, combining with Gold Bronze anodized Lever Handle.
- High Grade Premium Quality Material
- Suitable for 8-10mm Toughened Glass thickness
- Sleek Designs
- Designed for 24mm Rebate Depth Door frames

A modern glass door lock system with dynamic lines, featuring a glass door and a white wall. The glass door is partially open, revealing a white interior. The lock mechanism is sleek and metallic, with a horizontal handle. The background is a bright, minimalist room with a white wall and a white chair visible on the right.

Studio Gala

Glass door lock with dynamic lines

Glass internal door fittings Studio Gala set by the complete harmonic forms of locks and handles in a sophisticated ambience additional accents.

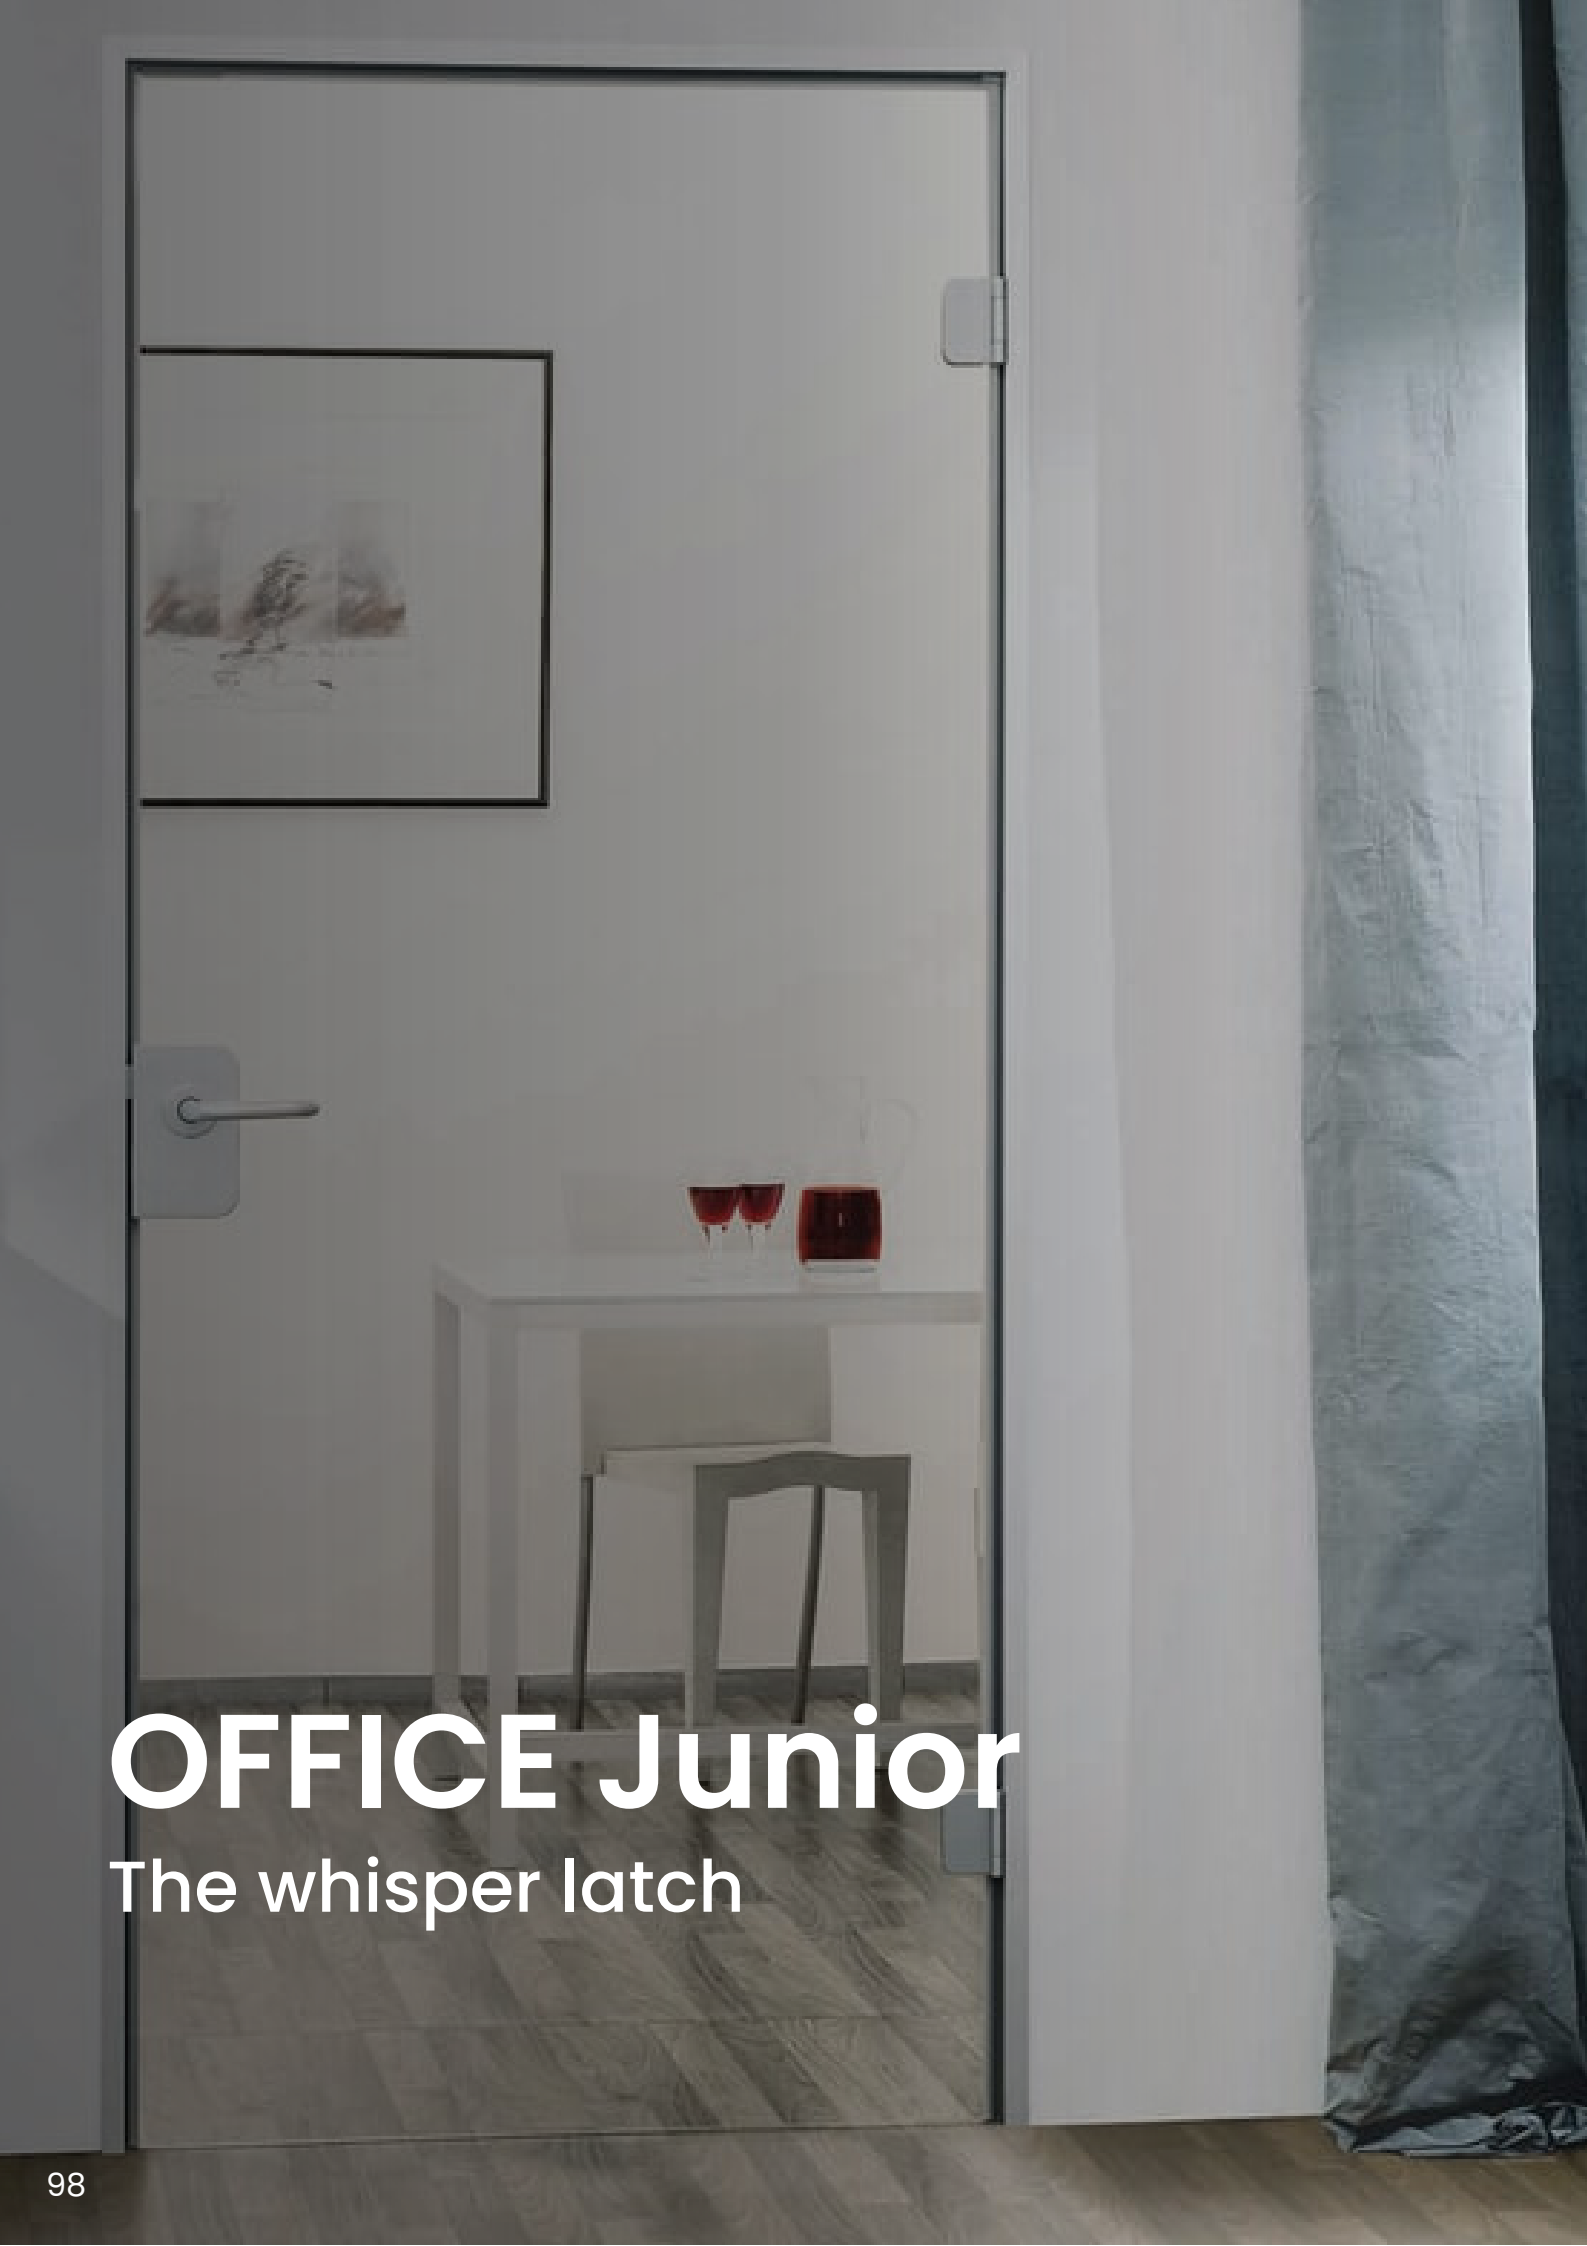

- Simple glass preparation, firm fixing
- Reliable operation
- Various surface finishes and lever handle types available

Swing door fittings with dynamic lines Emphasize the complete harmonic shape of locks and handle in a superior ambience.

Features & Benefits:

- A compliment for representative glass doors: Studio Gala set with its dynamic lines, a distinctive accent, and underlines the high standards of spacious glass architecture.
- The system is suitable for all levers without roses and is based on standardized glass processing. Complete sets with different lock options offer solutions for single- and double-leaf doors.

OFFICE Junior

The whisper latch

The Whisper latch

A timeless design, versatile and reliable functionality: The OFFICE Junior fitting system is designed for high loads and a long lifetime. With many different surface design variations and a large selection of lock variants, handles and straps, it is a reliable companion in both the living room and object area.

Product Details:

- Reliable under heavy stress
- Long lifetime due to high-quality materials
- Whisper-comfort noise reduction
- Adjustable handle position
- 500,000 motion cycles of the latch function and 100,000 motion cycles of the bolt were successfully tested by a neutral testing institute

Features & Benefits:

- Maximum door weight 60 kg
- Lock design, europrofile, warded, WC, KABA, or no lock
- Design: 1- / 2-panel, side panel
- Reliable under heavy use
- Low-noise function (silent pattern)
- Adjustable handle position

The background image shows a modern interior space. In the foreground, there is a glass partition with a vertical metal handle. Behind the glass, a room with white walls and wooden flooring is visible. A window with a white frame is on the wall. The ceiling has a wooden slat design. The overall lighting is warm and natural.

Marcato Motion

Controlled swing into the Zero Position

The MARCATO Motion fitting set from dormakaba-Glas automatically returns double-action glass doors to the closed zero position. The special feature: the closing force and closing speed can be adjusted to the user's requirements at any time, preventing the door from frequent swinging.

Clear

The appearance of the MARCATO Motion fittings clearly bears a clear signature: smooth, straight, with clear edges and defined radii. A self closing door leaf gets by with two hinges. It needs nothing else, because the adjustable closing function is included.

Comfortable

At a 90° opening angle, the door remains in the hold-open position; from 70° it closes automatically. The two hinges in a set complement each other in their functions: While one hinge closes the door towards the zero position, the other acts as a damper and regulates the closing speed. Thus, for example, fast closing is suitable for accesses to restaurant kitchens, while in retirement homes the movement of the door can be adapted to the needs of the residents and adjusted more slowly.

Cost-efficient

With only one MARCATO Motion fitting set, the swing door is available in its full function. Separate door closers are not needed. A great advantage especially in existing buildings with high-quality floor or ceiling designs or with underfloor heating. Neither floor nor ceiling need to be processed and remain unaffected.

Easy

The double-action door fittings are mounted on the horizontal glass edge with connection either to a wall or to a fixed glass side panel. The closing speed can be adjusted as desired at any time and adapted to changing requirements.

Features & Benefits:

- Hydraulic closing function (starting at 70° opening angle) without additional functional elements
- Closing speed (re)adjustable at any time
- Hold open at 90° opening angle
- Whether renovation or new design: Installation at masonry or frame.
- No need for door frame
- Glass-to-glass fittings with the installation of side-lights

A modern kitchen interior featuring a wide wooden floor with a natural grain pattern. On the left, there is a tall white cabinet with glass doors and silver handles. On the right, a white kitchen island with a countertop and a sink is visible. A large window in the background offers a view of the ocean under a blue sky with light clouds.

Mundus

Create individual designs with
colors and materials

The freedom of versatility

The MUNDUS corner fitting series captivates due to its inspiring design, high-quality materials, and its meticulous workmanship. The fittings forego visible connecting elements between the base body and the cap as a design element. Thanks to its continuous, multi-dimensional adjustability, the door can quickly and easily be aligned when installed. It makes installation exceptionally easy!

Elegant look

MUNDUS fittings stand out thanks to their elegant shape with straight edges and rounded corners, high-quality materials, and maximum-precision finishing.

The harmony of the surface is not disrupted by the sight of any screws. To ensure a permanently elegant look, the cap consists of 2 mm thick – and thus particularly robust – material in the form of either stainless steel or aluminium.

Wide choice of finishes

Various attractive collections are available to adapt the patch fittings to the architectural finishes and color scheme of the building.

The focus is on providing a wide choice of materials with a selected, graduated spectrum from light to dark, from matt to textured and highly polished, and from integrating to accentuating.

Personal design with surfaces and colors:

- Elegant form with straight edges and rounded corners
- All settings can be made from the front when installed
- High-quality materials and meticulous workmanship
- No screw disturbs the surface harmony
- Collections with many variations and a high level of personal creative leeway

Easy and quick installation:

- Same glass processing as the preceding UNIVERSAL system; as a result, it can be used in existing systems
- Glass thickness can be seamlessly adjusted via the screw system
- Multi-dimensional adjustability when installed
- Seamless adjustment of pivot, alignment and zero position

ATMOS

Heavy-duty shower fittings for
extensive usage

The comprehensive range of ATMOS shower systems offers applications for all conceivable situations.

Classic frameless full glass shower systems with concealed spring mechanism offering self-closing from an opening angle of 20°. Double action hinges allow inward and outward opening.

Finishes:

- Polished Chrome

On request

- Polished Gold
- Satin Gold
- Rose Gold
- SS
- Black

Features & Benefits:

- Complete fitting series in modern design
- Easy Installation
- Double-action door fittings (inward/outward opening)
- Innovative door fittings with the spring mechanism
- Adaptable and infinitely variable zero positioning
- Manufactured and tested as per EN standards
- Certified for durability, water tightness, and stability

Xenia

Self-Raising Shower System

The All Glass Shower System

The XENIA shower system is aptly suitable for installations without a shower tray. The robust, stylish brass fittings raise the door a couple of millimetres on opening. The bottom shower seals are protected since they have no contact with the floor while the door is moving. The door closes automatically under gravity from an angle of approx. 45°. Once the door is shut, it is reliably resealed against the floor.
BH 200

Features & Benefits:

- Wall fixing with elongated holes
- Outward opening
- Glass fixing with counterplate
- Lift-lower function (+ 5 mm)
- Max. door weight: 40 kg
- Self-closing from 45°
- Continuous seals along all glass edges
- Invisible screw connections
- Hinge has glass Adjustability function -2/+2mm
- Hinge glass/wall factory-modifiable with reversible external fixing plate
- W = fixed screens with brackets P= fixed screens with profiles
- Glass type: TSG

Muto Sliding system

Effortless Sliding door solution

The compact, flexible manual sliding door system

Whether for living or office areas, wherever elegant transitions from one room to another need to be provided, toughened glass assemblies offer the architectural elegance of open, transparent, inviting access. Sliding doors also add a certain lightness and a more generous appearance to small rooms. Easy-to-install solutions mean that your space-defining idea in glass can be readily made a reality.

Compact, flexible and with a wide range of options. Simple installation and adjustability from the front. Convenience “Comfort” options such automatic closing function and integrated battery-operated lock eliminating the need for an external power supply MUTO is also available as telescopic variant.

Features & Benefits:

- Concealed Mechanisms
- Suitable for Glass and Timber doors
- Self Closing action
- Integrated Electro Mechanical Lock
- Indicator Switch
- Damping Mechanism(DORMOTION)
- Light and Heavy Doors (50- 150Kgs)
- Synchro and Telescopic system
- Easy Installation and adjustments,
- Openable Cover profile

AQUARIUS

Premium Sliding Shower System

Refined Sliding Shower System

The refined sliding door system without floor profiles enables entering without obstacles. The overlapping of door and fixed glass leaf increase the overall impression by preventing additional sealing profiles.

- Aquarius is a shower system that consists of a sliding glass panel as the inlet.
- The design of the sliding door mechanism protects it against the spraying of water and generates a longer life cycle.
- The Aquarius shower system is designed without floor profiles which enable obstacle-free entry.

Finish available:

- Chrome finished profiles and Chrome finished roller hangers and Door knob
- Mill finished profiles and Chrome finished roller hangers and Door knob
- RAL White finished profiles and RAL White finished roller hangers and Door knob

Features & Benefits:

- Sliding door and in-line panel as a recess
- Corner shower enclosure with two sliding doors and two in-line panels
- Corner shower enclosure with sliding door and in-line panel, and 90° buttress side panel
- Corner shower enclosure with sliding door and in-line panel, and 90° side panel
- Two sliding doors and two in-line panels on the bathtub
- Two sliding doors and two in-line panels, and 90° buttress panel on bathtub
- Manufactured and tested as per EN standards DIN EN 14428
- Certified for durability, water tightness and stability

Folding Sliding Wall (FSW)

**Ideal solution for linking or
separating rooms**

With their versatile glass partitions, dormakaba provides the ideal solution for linking or separating rooms according to your individual requirements. FSW folding sliding walls are a suitable alternative to HSW-G systems as they almost match in terms of their visual appearance and technology.

FSW-G – Fully glazed with door rails

The FSW-G door rails connect at top and bottom hinges, with panels suspended from the top rails. It transforms into a compact parked stack without a separate track.

Folding sliding walls are ideal for a straight-line system configuration

FSW panels work with the same track rail as HSW-G panels, allowing for a seamless combination. An HSW panel can be added for more options.

FSW-C – Roller carrier position at door rail centre

Panels hung centrally for tight spaces, large spans, 3-8 panels/system, sturdy ceiling track rail, no floor track needed, half-width base panel.

FSW-C plus – Roller carrier position at door rail centre plus full-width sliding folding panel

The FSW-C plus model offers a final folding panel as an access door when the frontage is closed, with a special bottom locking device and top clamp-mounted stop. Folding hinges have a large pivot point offset to create room for the door closer and pull handles.

Features & Benefits:

- Suitable for 10 & 12mm TSG
- For Heights upto 3000mm
- Rails – 100mm Top and Bottom
- Panel Widths – 750 – 1000mm
- Panel Weights – 70 kgs per panel
- Parikng Type – FSW-G/FSW-C
- Brush Seals – Top & Bottom
- Functional Components concealed in Profiles
- Tested for 10,000 Cycles
- Spatial Efficiency , can be positioned in Seconds
- Quick Installation

Horizontal Sliding Wall (HSW)

Safe sliding glass wall stands for high transparency and safety

Secure hold safety glass

The HSW EASY Safe sliding glass wall stands for high transparency and safety during use. In this toughened glass assembly, the panels create a thorough, transparent surface – without any lateral frames. Whether it's straight or angled pathways they adapt to your personal needs and are suitable for modernizations and new constructions.

The new door rails allow for effortless and time-saving installation.

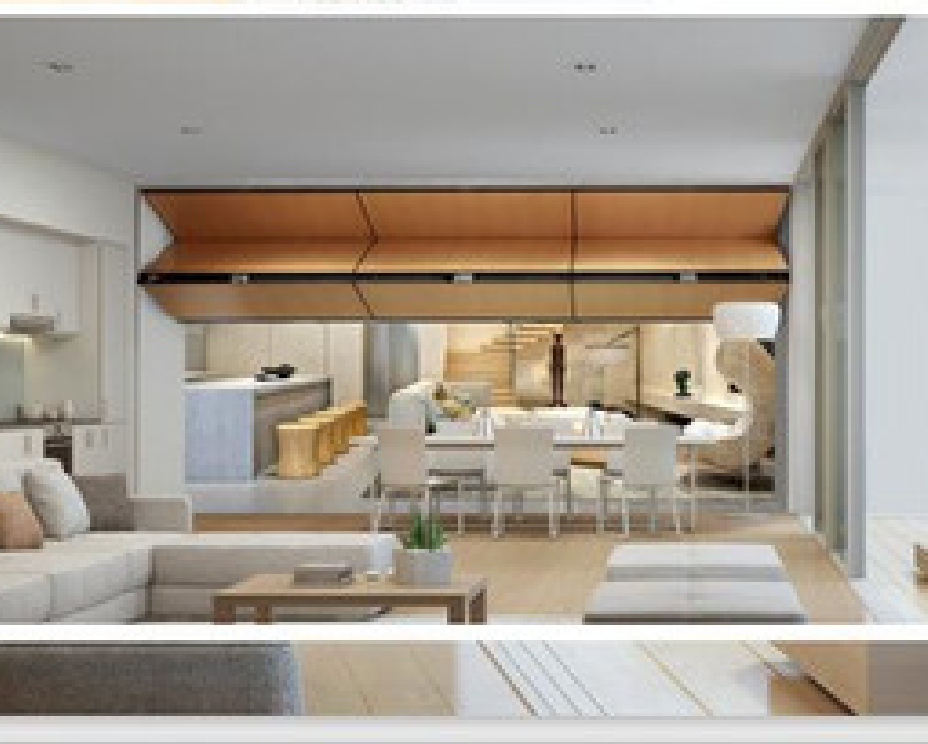

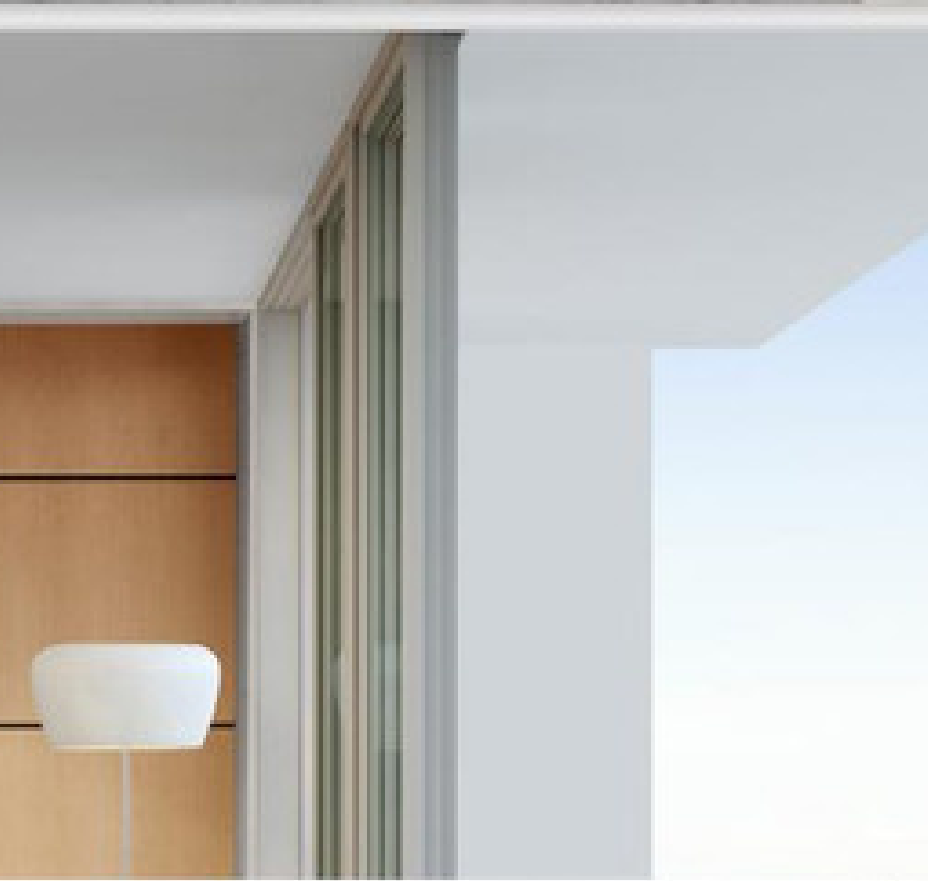

- Easy and quick installation
- Easy and secure to use
- More planning freedom and security

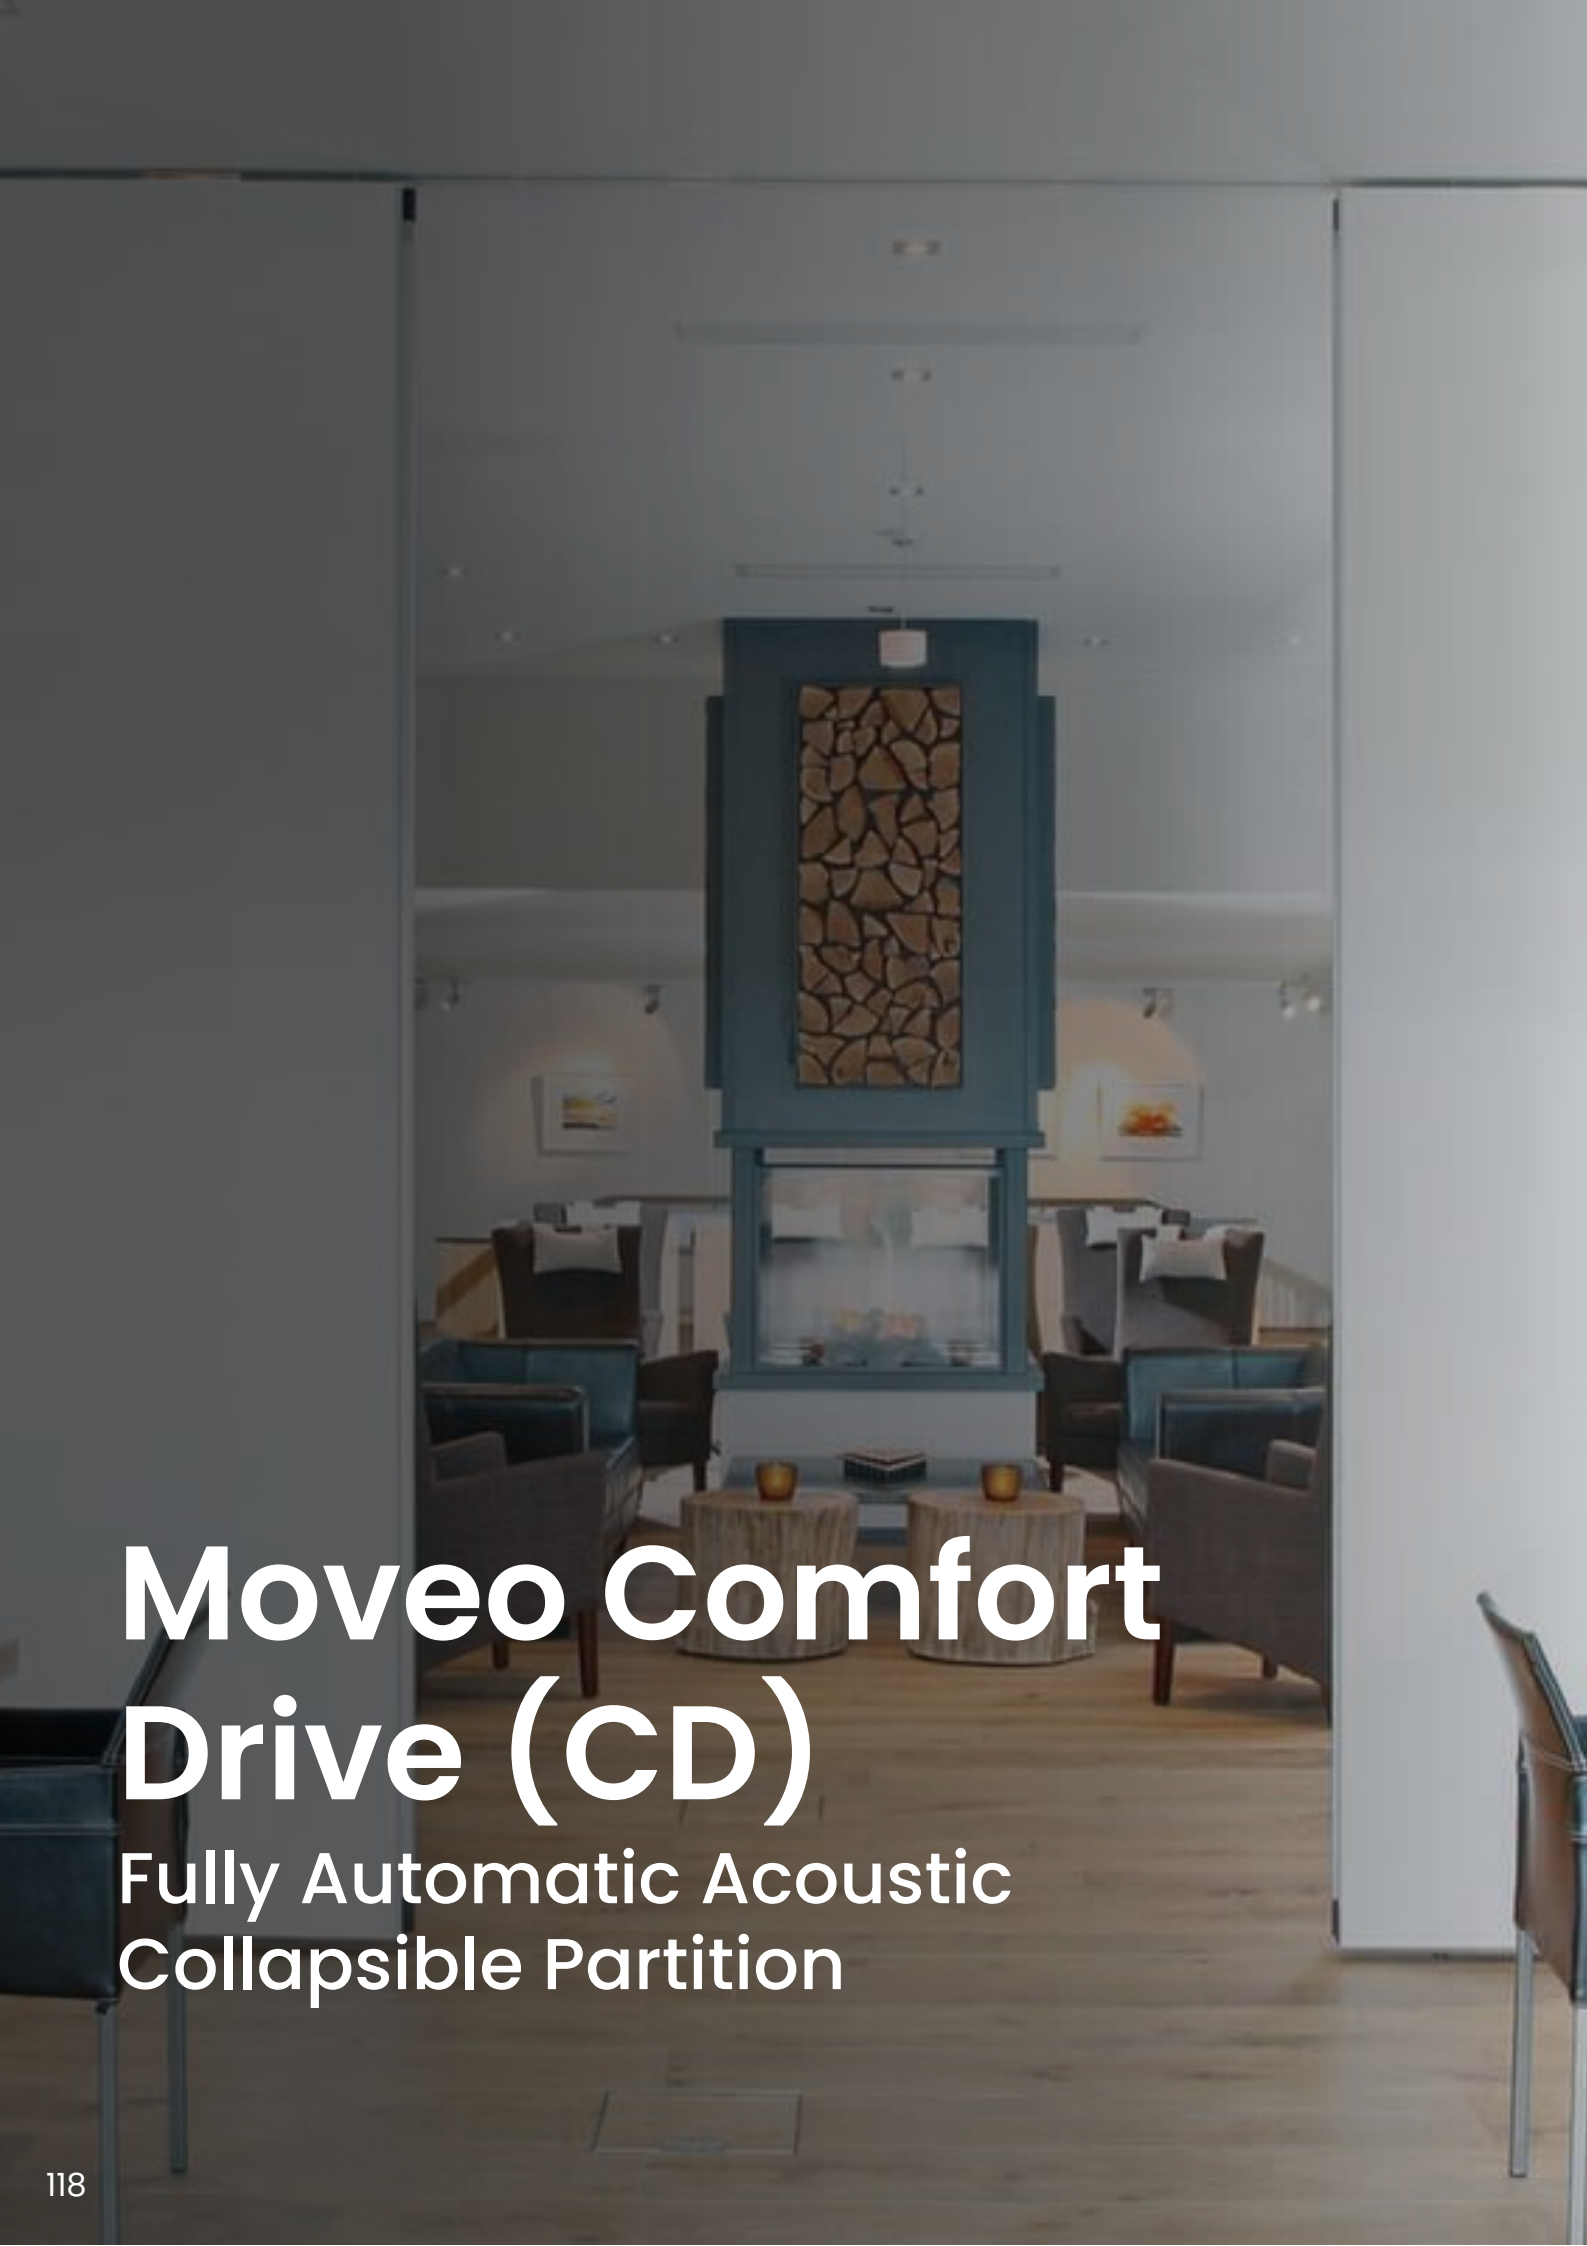

Features & Benefits:

- Free glass corners for high transparency
- User-friendly panel operation
- Easy installation, even without a support profile
- Multilock with three locking options
- Upper lock with status display
- The lower lock can be operated by foot

Movable Walls

Moveo Comfort Drive (CD)

Fully Automatic Acoustic
Collapsible Partition

For efficient space utilization

Conference rooms and offices are today able to benefit from flexible spatial management. It all becomes possible with MOVEO movable, sound-insulating partitioning systems with opaque elements and the MOVEO Glass version comprising transparent elements. With these systems, it is possible to modify room sizes with ease, flexibility and speed, and thus adapt them to different occupant group sizes. Floor plans thus become multifunctional and more spatially efficient.

There is a demand for intelligent solutions that enable a multifunctional and yet open-plan spatial configuration. For this, the MOVEO and MOVEO Glass ranges offer partition systems that harmoniously combine transparent and sound-insulating room concepts.

Features & Benefits:

- High stability with low weights per unit area
- ComforTronic® seal actuator for enhanced convenience and greater safety
- Sound insulation ratings up to Rw 55 dB
- MOVEO Glass – full-face glazing
- ComfortDrive – fully automatic version
- Optional inboard acoustic surface

A modern living room with a large glass partition and a city view. The room features a light-colored sectional sofa with several pillows and a dark blanket. The glass partition is made of large panels with dark frames, and it is partially collapsed, revealing a panoramic view of a city skyline. The ceiling is a flat, light-colored surface with a recessed lighting strip. The floor is a dark, polished material.

Varitrans

Fully Automatic Glass
Collapsible Partition

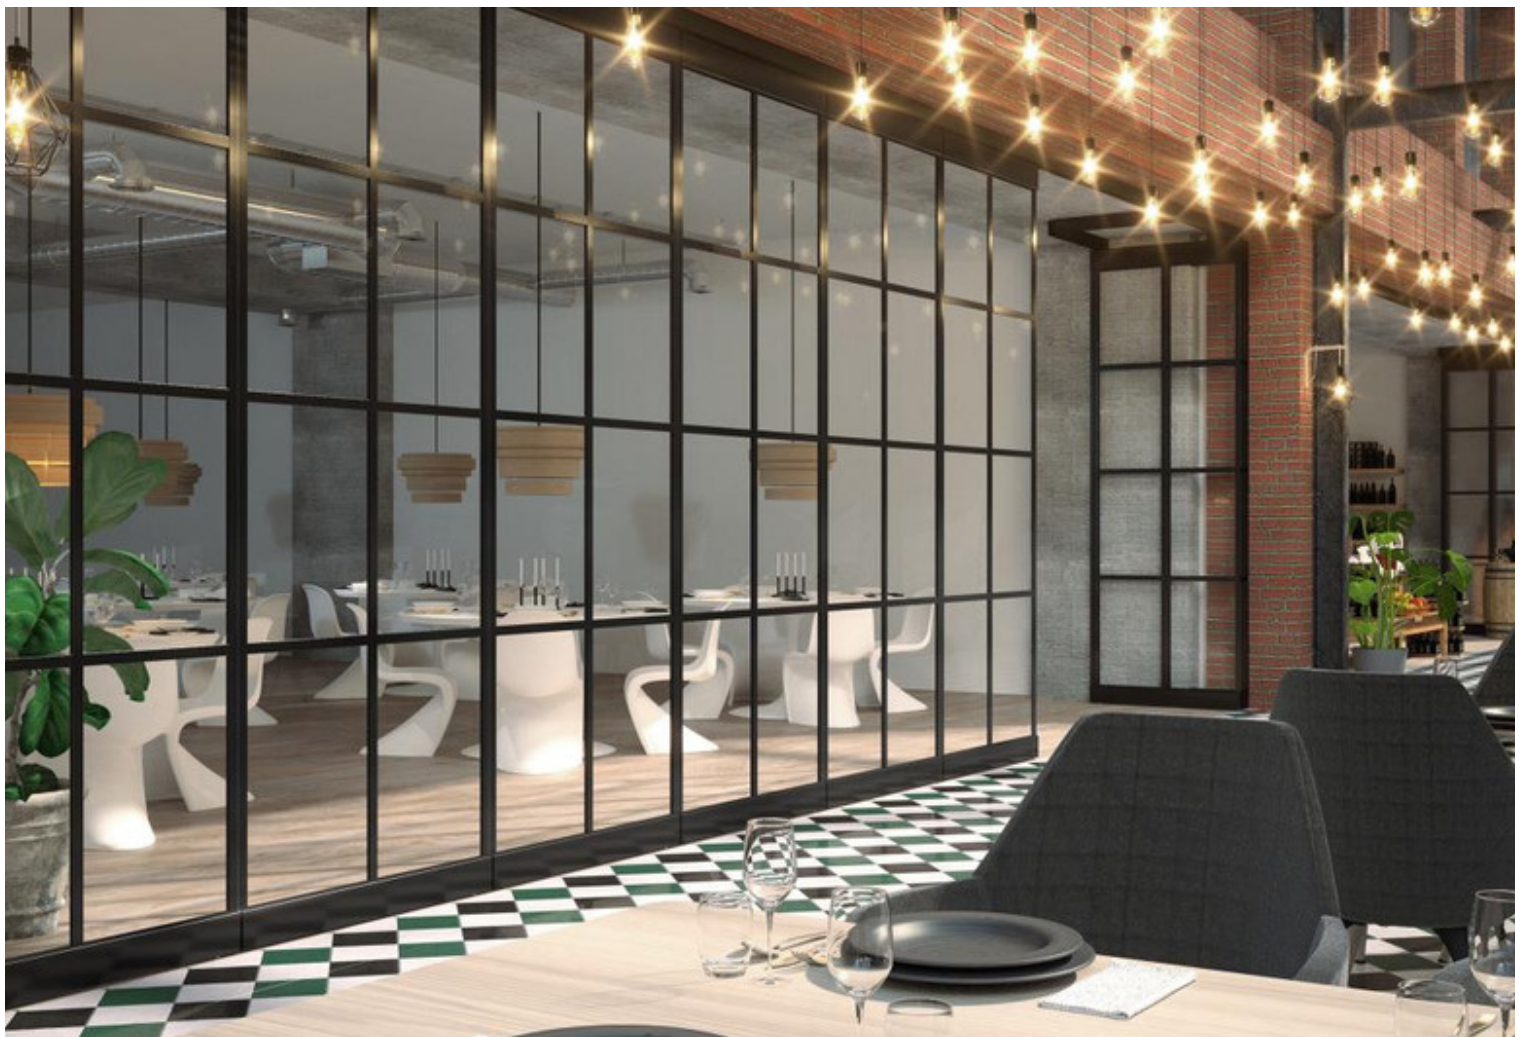

Varitrans offers outstanding perspectives for generous spatial effects aligned to modern design. The operable, light-admitting glass elements are individually positionable and generate an overall visual impression of inviting openness and transparency

Varitrans Comfortdrive Framed Systems

- Create & Divide spaces with own flexibility
- Grid Design possible
- More sunlight and brightness through use of Glass
- Completely Automated System

Features & Benefits:

- Openness with natural aesthetic allure
- Elegant design for an integral appearance
- iF-award winner
- Flexible modular system with extensive design options and door solutions
- Manual and fully automatic operating modes

Skyfold Zenith

The slimline model

Innovative Vertical Wall System

Skyfold is a vertical movable wall system that retracts to the ceiling. It is space-saving, requires no guide or track rails and offers acoustic insulation up to Rw 59 dB. The Zenith model folds only in its upper section, which means furniture can be placed nearer to the movable wall; and the Zenith Premium model comes with an integrated ceiling trim to seal off the gap when the wall is lowered.

Features & Benefits:

- A space-saving vertical movable wall system that retracts to the ceiling
- Fully automatic, rapid and reliable
- Easy operation at the press of a button
- No wall or floor rails
- Acoustic insulation with sound reduction ratings up to Rw 59 dB
- Straight-line configurations
- Stable and flat lightweight construction from 29 kg/m²
- Can be provided with effective acoustic finish (Zenith NRC)

Skyfold Prisma

See Your Spaces in New Light

Acoustically advanced glass panels that control the noise but let the light in

Streamlined Prisma not only let the light shine in, but it does so without the use of any wall or floor tracks, rendering it completely invisible when stored into the ceiling.

Skyfold Prisma's slim metal frame, clean lines, and sleek design will add elegance and natural light to your flexible spaces. Skyfold Prisma's glass panels allow for sunlight to penetrate otherwise dark rooms and corridors, creating a more pleasant atmosphere that positively affects mood and productivity. With an STC rating of STC 52 / Rw 52, the Prisma ensures privacy between spaces, allowing confidential meetings, classes, and collaboration to occur simultaneously. Its slim frame allows for unencumbered sight lines, allowing your flexible space to feel more open, even as it's being divided.

The Skyfold Prisma, with finish options that include frosted glass and solid panels, creates a functional design piece to match your space's aesthetic.

With a streamlined tapered-down deployment, the Prisma is ideal for tighter spaces with potential obstructions, which would otherwise limit the use of a vertically folding retractable wall.

Features & Benefits:

- Retracts into the Ceiling to Conserve Floor Space
- Industry-Leading STC rating of STC 52/Rw 52
- No Floor or Wall Tracks
- Fully Automatic
- Easy-to-use digital keypad operation
- Quiet Operation
- Equipped with a safety obstruction sensor

Our Sustainability Commitment

Sustainability is at the core of our vision, which underlines our long-term commitment to shaping a more sustainable industry and future.

In our sustainability framework we focus on three pillars: People, Planet and Partnerships supported by over 30 concrete targets.

People: We empower our people so that they can unlock their full potential

We create a fair, inclusive and safe culture which enables our employees to thrive. We provide a workplace where they can continuously grow, openly contribute with their ideas and feel proud of their achievements.

Planet: We open the doors wide to a low-carbon and circular economy

We develop innovative and resource efficient solutions for the circular economy and do our part to ensure a climate resilient future. We offer durable and energy efficient products that help our customers achieve their own sustainability goals.

Partnerships: We collaborate to promote sustainable development beyond our own doors

We lead by example and engage with our partners to drive more eco-friendly practices and support the protection of human rights. Through our secure access solutions, we also contribute to people's health and safety. We work with partners to raise awareness on safe operating practices of our products.
